

EMCON External Multi Use Enclosure

EMCON's External Multi Use Enclosure is a TEMPEST Level I device that allows the user to connect additional peripherals or disk space to a TEMPEST Level I workstation.

The design is capable of housing two full size 5.25" devices with adapters to use 3.5" device if required.

If removable media is required, a door is added but no door is required if the enclosure is used as an additional hard drive.

There are both power and activity LEDs on the front panel.

The peripherals installed in the enclosure can be IDE, SATA, or USB. An internal circuit provides the necessary power filtering and conversion so the external connection to a TEMPEST CPU is USB.

Input power to the power adapter is 90 to 240VAC and available with multiple power cord pin styles.

Physical Specifications

Dimensions

Height	12.70 cm (5.0 in.)
Width	17.15 cm (6.75 in.)
Depth	29.21 cm (11.5 in.)
Weight	4.55 kg. (10.0 lbs.)
	<i>Depending on installed peripherals</i>

Warranty

Three-year, parts and labour, return to depot
