

EMCON USB DeskSaver CC - Two and Four Port Models

EMCON's USB DeskSaver CC is a trusted, non-TEMPEST, secure KVM switch that eliminates equipment duplication by allowing a user to switch between CPUs processing different levels of sensitive information while sharing a single monitor, keyboard and mouse.

Available in both two-port and four-port versions, the USB DeskSaver is ideal for government users. It ensures classified information will not inadvertently be routed to a CPU processing unclassified material. In the event of a power failure, the signals to and from all CPUs are disconnected.

DeskSaver complies with port-to-port isolation characteristics for switches defined in NSTISSAM TEMPEST/2-95, RED/BLACK INSTALLATION GUIDANCE, paragraph 4.3.

Key Features

- Saves desk space: only a single monitor, keyboard and mouse are required to work with the CPUs.
- Ease-of-use: simple button activation.
- Ideal for use in data-sensitive installations: LEDs with labelling indicate which computer system is active.
- System compatibility: suitable for use with Microsoft® Windows® XP running on IBM compatible PCs with VGA or higher resolution graphics and USB keyboard and mouse.
- Interface cables – TEMPEST or commercial - are included as applicable.

Specifications

Interfaces

CPU Ports

Keyboard & Mouse USB-B

Video HD-15

Common Port

Keyboard & Mouse USB-A

Video HD-15

Power

110 or 220 VAC, 60 Hz external power cube
CSA/UL/CE approved

Dimensions and Weight

Height 5.51 cm (2.17 in.)

Width 25.96 cm (10.22 in.)

Depth 13.89 cm (5.47 in.)

Net Weight 1.82 kg (4.0 lbs.)

Warranty

Three-years, parts and labour, return to depot
